We adhere to the highest standards of our profession's ethics and conduct. Our staff works together to achieve common goals, through trust, honesty and accountability.

Job Description:

Keller Engineers of New Jersey is seeking a civil engineer with an emphasis in highway and roadway design. The successful candidate will be supporting our Civil/Highway Design Services group located in the **Camden, NJ office**. The work will employ fundamental principles including surveying, trigonometry, geometrics, fluid mechanics, utility coordination (including relocation and agreements), hydrology and hydraulics, cost estimating, and transportation engineering while using applicable software. The candidate will be involved in and complete all phases of infrastructure project development. The candidate will report directly to the Director of Civil/Highway Design Services.

Required Skills & Required Experience:

The position requires a BS in Civil Engineering, 5-10 years of experience; the ability and desire to work in a team environment, sound oral and written communication skills; excellent organizational skills; proficiency in CADD (Microstation and InRoads and AutoCAD Civil 3D), AutoTURN, Microsoft Office (i.e. Word, PowerPoint, Excel and Outlook) along with various other civil design applications; experience in the production of plans, specifications, and engineer's estimates for roadway projects for NJDOT, NJTA, PANYNJ, and County or Municipal agencies; a firm grasp of roadway engineering skills such as geometric design, grading, permitting, coordination with utility companies and the production of utility schemes of accommodation, roadway drainage design, 3D roadway modeling, etc. A PE or the ability to pass the PE within the first year of employment with Keller Engineers is desirable.

Keller Engineers of New Jersey, LLC is an Equal Opportunity Employer.

Candidates should submit their resume to:
